Hi Anil,

on today I have informed my collaborators about TE-SARLA project; I have introduced and widely explained it as an important agreement between two companies that believe in the innovation of organizational models in order to manage the growing complexity of the global world.

Personally, in Sarla I have appreciated:

- the high competence spread at the different levels of the excellent organization (like an orchestra directed by Zubin Mehta);
- the high quality of the design services on different technological platforms that today are present in the industrial process automation market.

Competence, continuous improvement, quality, safety and innovation managed by the values of professional ethics are the essential elements that will distinguish the whole life cycle of our coming projects.

Best Regards

Fausto Beghelli
