

■ Sarla Technologies

The Best- In-Class Industrial Automation & Plant IT Solutions Provider

By Our Correspondent

The automation technology has brought great achievements in many industrial areas including manufacturing, automotive and transportation. This technology provides higher production rates, increased productivity, improved safety and better product quality. In fact, by implementing automation technology, manufacturing companies have been able to maximize their resources and profit at the same time provide good and consistent quality products.

While companies are busy automating their plant processes, in most manufacturing environments, the factory floor is populated by heterogeneous legacy systems that neither

operate in real time nor connect to the enterprise information systems. Manufacturers have a critical need to integrate these disparate systems in real time to have single view of production data, rectify errors and take proactive decisions. Manufacturers need to improve responsiveness, shrink cycle times, and improve their return on assets/return on investment (ROA/ROI). These objectives are achieved by connecting shop floor systems to inter-enterprise information network in real time.

Sarla Technologies has been providing best-in-class Automation and Plant IT solutions that have helped manufacturers connect-integrate-analyze their manufacturing data in real time.

Anil Mehta
CEO

The ISO 9001: 2008 and CSIA certified company has a global presence with offices in Mumbai-India, Milton Keynes-UK, Pittsburgh-USA, Oslo-Norway, and Dubai-Middle East.

The gamut of automation engineering solutions offered by Sarla Technologies covers diverse industry verticals. It is a one-stop shop for Automation and Plant IT services in Plant Intelligence, Production Management and MES across diverse industry verticals including food & beverage, life science, oil & gas, automotive, cement, metal, steel, energy & power, infrastructure and utilities.. "Manufacturers have connected and integrated their shop floor to top floor thus gaining real time visibility of their manufacturing ecosystem. We help manufacturers increase their plant productivity and efficiency while reducing cost," pronounces Mr. Chetan Puthran, Head Plant IT Solutions

business, who has been building Sarla brand in the India region.

Our portfolio of PLANT INTELLIGENCE SOLUTIONS enables manufacturers connect disparate systems within their plant right from shop level to top level enabling manufacturers integrate production processes thus gaining real-time visibility into production data. The solutions are designed to make real-time business sense from plant data, helping organizations leverage existing investments in plant automation to increase productivity, improve process flow, lower costs, shorten cycle times, reduce total defects and improve

the return on investment. Senior management can take critical decisions quickly and reliably. To achieve transparency and accessibility for plant information, web-based reporting is created and corporate accountability is completely assured. We also distribute and implement products that enhance plant productivity including products like HMI/SCADA, data historian, web-based real time analysis, workflow and production management, change management, MES, electronic batch process recording, S88 compliant batch.

The company has been delivering solutions since the last 11 years, catering to the automation requirements of clients worldwide. The company is on growth track and has witnessed a high growth rate during the last 3 years. It is the wealth of benefits, opportunities nationally as well as internationally,

domain & industry knowledge offered to the advantage of the employees that has facilitated retention. "We are the only one in terms of quality and service specialty. And we are the only company having in-depth experience across all layers of automation right from plant floor to the business level. We are also the only company that can develop software along with automation implementation, and one of the few Indian companies operating globally on a large scale and having much recognized CSIA and ISO 9001:2008 certification," says Mr. Anil Mehta - CEO, who has been instrumental in steering Sarla Technologies towards fast growth. Sarla Technologies has also received Con-

Sarla Technologies has also received Control System Integrators Association, North America (CSIA) certification which is sought-for" certification by all automation companies those are willing to carry our business in the US & Europe market. We are one of the very few companies who have received this CSIA certification.

trol System Integrators Association, North America (CSIA) certification which is sought-for" certification by all automation companies those are willing to carry our business in the US & Europe market. We are one of the very few companies who have received this CSIA certification.

It is the company's commitment to deliver world class solutions on time, cost effectively that has won it the trust of some of the big names of the industry. What started with five people in the year 2000 is today a multi-crore company with 175 + employees. With over 5000 plus installations throughout India and having 130 plus global customers worldwide, the company has a proven track record of delivering reliable and proven support services in compliance with international standards. Five years down the line, Sarla Technologies envisages to expanding further in terms of geographical reach besides employing 1000 staff.

Plant Intelligence Solutions

Connect your Plant Floor to Enterprise Systems

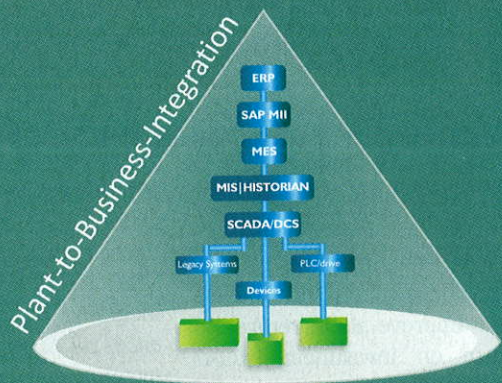

Sarla Technologies an ISO 9001:2008 and CSIA certified company, is a specialist in the domain of Automation, Production Management and Plant Intelligence. We are an internationally recognized company in the Industrial Automation domain providing Automation and Plant IT solutions that help manufacturers connect and integrate their shop floor to top floor providing real time visibility of manufacturing data.

Products

- HMI/SCADA | Data Historian | Web-based real Time Analysis | Workflow & Production management
- Change Management | MES | Electronic Batch process recording | S88 Compliant Batch

Solutions

- Integration of Plant control systems, enterprise systems or any home grown MIS systems from plant floor to enterprise level.
- Generate KPI's real time visibility & reporting from various plant systems
- Solutions for Electronic Batch process recording, Batch Automation and Recipe Management
- Data Acquisition Solutions from current as well as legacy systems
- Manufacturing Intelligence & Integration with Sap MII solutions
- Solutions for diverse industry verticals including Food & Beverage, Life science, Metal & Mining, Cement, Oil & Gas, Energy & Power and Utilities.
